Summary

Software Engineer. Google Summer of Code contributor at CNCF Falco and Speaker at Kubecon Chicago. Currently pursuing master's in computer science at Linköping University.

Education

- **Linköping University** — Linköping, Sweden
  Computer Science, Master's Programme - 6MICS — *Aug. 2024 – Aug. 2026*
- **Reva University** — Bangalore, India
  Bachelor's in Computer Science and Engineering GPA: 8.75/10 — *Aug. 2019 – July 2023*
- **Deeksha Pre University** — Bangalore, India
  Pre University PCMC: First class — *Aug. 2017 – Feb. 2019*

Experience

- **Google Summer of Code at CNCF Falco** — Remote
  Open Source Developer — *May 2023 – Sep. 2023*
  - **Building Falco Playground using Wasm**: Contributed to the development of a Falco rules playground as part of the Google Summer of Code program. Worked on creating a web-app leveraging WebAssembly. Collaborated closely with a mentor to take the project from concept to completion, providing a dedicated environment for writing and experimenting with Falco rules.
  - **Skills**: C++, CMake, React, Cypress, Redux, TypeScript, WebAssembly, GitHub Actions, Kernel
- **Motorola Solutions** — Bangalore, India
  Internship Trainee — *July 2022 – Dec. 2022*
  - **Messaging Team**: Worked on Spring Boot microservices and internal tools used for push-to-talk communications in critical and emergency environments
  - **Skills**: Java, Linux, Docker, Jira, Spring Boot basics
- **Betsol** — Bangalore, India
  Software Engineering Intern — *Jun. 2022 – July 2022*
  - **Docker Containerization**: Containerized Swiftcode repository (Play Framework) to deploy the application using Docker.
  - **Skills**: Docker, Scala

Projects

- **Document Data Extractor & Dashboard**: AI-powered platform for document parsing and extraction with a user/admin portal, schema builder, analytics, billing, and multi-protocol API. Built with Next.js, React, Node.js, tRPC, Prisma, PostgreSQL, and Google Gemini integration.
- **Crux**: C++ implementation of the Lox interpreter, following the principles in the Crafting Interpreters book by Bob Nystrom.
- **LinkedList**: Templated version of a linear linked list mimicking the C++ STL style. Built to learn and practice C++ concepts.
- **Telemetry Observability For Self-Piloted Robot**: A self-piloted robot with infrared sensors follows a predefined path, using sensor data to make decisions. Journey data is sent to a database for real-time analysis.
- **TripTalk**: Web application built with React that allows users to create travel blogs.
- **Reva Results**: A Python and XPath web scraper that scrapes and formats the results site and displays student marks.

Open Source Contributions

- **Falco Security** — Bangalore, India
  Contributor — https://github.com/falcosecurity — *Apr. 2023 – Present*
  - **Falco Libs**: Falco is a cloud-native security tool designed for Linux systems. It employs custom rules on kernel events, enriched with container and Kubernetes metadata, to provide real-time alerts. My contributions involved adding additional syscalls to the core Falco libs repository.
- **Layer5** — Bangalore, India
  Member/Contributor — https://github.com/meshery — *May 2022 – Dec. 2022*
  - **Meshery**: Meshery is the cloud native management plane offering lifecycle, configuration, and performance management of Kubernetes, service meshes, and workloads. My contribution involved improving the UI/UX of the application and making documentation changes.

Talks and Presentations

- **The Falco Playground: A Cocktail of WebAssembly and Runtime Security** — Chicago, Illinois
  Working of Falco and Falco Playground — *YouTube: Link* *Slides: Link*
- **Building a Docker Extension from Scratch** — Microsoft Reactor, Bangalore
  Inner workings of Docker extensions and building a sample app — *Slides: Link* *Highlights: Link*
